FORGE MILL & BORDESLEY ABBEY

Our beautiful site is unique in that it shows two distinct areas of our country's rich historical heritage from Medieval monastic life to the hardships of working in a Victorian needle mill in the industrial revolution. Redditch was famous for producing a staggering ninety percent of the world's needles during Victorian times.

The Forge Mill tour has expert guides to take you around this historic mill to bring to life the fascinating & sometimes gruesome story of how the humble needle was made.

You will also experience the (largely) unchanged atmosphere of an original scouring (polishing) mill: much of the original Victorian water powered machinery remains & is working for group visits. We are the only remaining water powered needle scouring left in the world!

Our link with needles is also celebrated through regularly hosting textile exhibitions.

The needle mill itself is set in the beautiful grounds of a twelfth century Cistercian Abbey. The museum also offers tours of Bordesley Abbey which is just a short walk from the Mill.

The Abbey has been extensively excavated & many of the archaeological finds can now be seen in the Visitor Centre which tells the story of the Abbey from its development to the Dissolution.
